

R. Narasimha

Cloud Engineer | DevOps Engineer

✉ simhasatya970@gmail.com ☎ 9705003814 📍 Bangalore

PROFILE

DevOps Engineer with 5+ Years of Experience in Cloud Platforms & Automation and Skilled in designing, implementing, and maintaining scalable **cloud infrastructures, CI/CD pipelines**, and containerized applications. Expertise in **AWS, Azure, Terraform, Kubernetes, Jenkins, Docker, and Shell scripting**. Proven ability to optimize processes, enhance application performance, and collaborate in agile team environments.

PROFESSIONAL EXPERIENCE

- Experienced in **Git, GitHub, GitLab** for version control and software configuration management (branching, merging, tagging, release management)
- Skilled in **Infrastructure as Code** with **Terraform, Ansible, and AWS Cloud Formation** for automated provisioning, configuration management, and stack creation with rollback handling.
- Proficient in designing and maintaining **CI/CD pipelines** using **Jenkins, Git Lab CI, Azure DevOps**, ensuring faster and reliable releases.
- Hands-on experience with **AWS (EC2, VPC, ECS, EKS, RDS, S3, Lambda, IAM, Route 53, Dynamo DB, Cloud Formation)** and **Azure (VMs, AKS, Key Vaults, Redis, Storage, VNet)**.
- Administered **ECS clusters** including log analysis, health checks, and troubleshooting cluster events to ensure seamless integration and performance.
- Configured **ArgoCD Applications and AppProjects** for managing multiple microservices across development, staging, and production environments.
- Managed **automated synchronization policies** (auto-sync, manual sync, and self-heal) to ensure cluster state matches Git manifests.
- Monitored deployment health, rollbacks, and diff comparisons directly through the **ArgoCD UI and CLI**
- Strong expertise in **containerization with Docker** and deploying **micro services on Kubernetes** using **Helm charts**.
- Implemented monitoring and logging solutions using **Prometheus, Grafana, ELK, Azure Monitor, Cloud Watch**.
- Automated routine tasks with **Python scripting**, reducing manual effort and improving operational efficiency.
- Expertise in **Maven build automation** and **artifact management with Nexus**, streamlining Java application releases.
- Skilled in **troubleshooting system, application, and infrastructure issues**, providing support and ensuring high availability.
- Experienced in **Agile & Scrum methodologies**, collaborating with Dev & QA teams, client interactions, and creating technical documentation

PROJECT SUMMARY:

Caterpillar

May 2024 to till date

Description: Caterpillar has been a trusted partner in India's infrastructure growth for decades, supporting critical sectors such as mining, power, and transportation. With over 50 years of manufacturing in India, the company operates advanced facilities, R&D centers, and service organizations delivering solutions for global markets. Cat products have played a vital role in iconic projects like Bhakra Dam and Atal Tunnel, recognized for reliability and efficiency. Driven by innovation and a diverse workforce, Caterpillar continues to lead in building a sustainable future.

Key Responsibilities:

- Designed and implemented scalable solutions using **AWS and Azure services**, including EC2, VPC, ECS, EKS, RDS, S3, Load Balancers, Cloud Front, IAM, VMs, AKS, Key Vaults, Redis, Storage, and VNet.

- Automated infrastructure provisioning with **Terraform, Ansible, and Cloud Formation**, improving deployment speed and ensuring repeatable, version-controlled IaC.
- Containerized applications with **Docker** and deployed **micro services on Kubernetes** using Helm, improving deployment reliability and speed.
- Administered **ECS clusters**, automated **S3 tar ball updates & IAM policy management**, reducing manual effort and ensuring secure operations.
- Configured **AWS S3 buckets, firewall rules, ELB, and Auto Scaling** for secure and high-performance application delivery.
- Deployed **daily builds in dde-dev-stack and QA Stack**, including patch files, and collaborated with developers on updates and patches.
- Successfully **administered ECS clusters and automated S3/IAM updates**, reducing manual effort and streamlining operations
- Strengthened **security and compliance** by addressing vulnerabilities via **Qualys, Docker scans, CIS-CAT**, and actively supporting ISO audits.
- **Created a Cloud Maturity Artifact Tracking Wiki Page** and **Sumo Logic dashboards**, enabling continuous improvement, data visualization, and actionable insights.
- Participated in **monthly maintenance window deployment support calls**, contributing to system reliability and uptime.
- Reduced **deployment failures by 30%** by integrating **SonarQube** and optimizing **CI/CD pipelines**.
- Strengthened **security and compliance** through **Qualys vulnerability remediation, Docker scans, CIS-CAT assessments, and ISO audit support**.
- Improved **system reliability and uptime** by proactively monitoring **ECS clusters, CloudWatch, Prometheus**

HCL-Technologies

April 2020 to April 2024

Client: XM

Description: Infor is a global leader in industry-specific business cloud software, trusted by over 60,000 organizations worldwide. The company delivers complete cloud suites that enhance user experience, leverage data science, and integrate seamlessly with existing systems. With its cloud first approach, Infor helps enterprises drive digital transformation, improve efficiency, and adapt to market disruptions while enabling sustainable growth and innovation.

Key Responsibilities:

- Implemented scalable solutions using **AWS and Azure AKS**, ensuring high availability for micro services deployments.
- Automated **end-to-end CI/CD pipelines** with **Azure DevOps and Jenkins**, integrating builds, tests, security scans, and releases, improving deployment speed by **40%**.
- Developed and managed **Ansible playbooks and inventories** for automated server provisioning, configuration, and deployments.
- Built and optimized **infrastructure-as-code** using **Terraform and Jenkins jobs**, enabling repeatable and version-controlled deployments.
- Monitored systems and clusters using **Azure Monitor, Log Analytics, Cloud Watch, and alerting tools**, ensuring early detection of critical issues.
- Partnered with **development and QA teams** to improve release quality, reducing production defects by **30%**.
- Possess solid knowledge in **smoke testing**, validating functionality after deployments or updates.
- Coordinated on **Git workflows, branching, and Maven build management**, ensuring smooth version control and build processes.
- Built and optimized **CI/CD pipelines** using **Jenkins, GitLab CI, and Azure DevOps**, integrating **SonarQube** for code quality and reducing deployment failures by **30%**.
- Implemented **proactive monitoring** using **Prometheus, Grafana, ELK, Cloud Watch, and Azure Monitor** to enable early detection and resolution of issues
- Increased **deployment speed by 40%** by automating **end-to-end CI/CD pipelines** with **Azure DevOps and Jenkins**.
- Reduced **production defects by 30%** by collaborating with **development and QA teams** and implementing automated builds, patch deployments, and smoke testing.
- Successfully **deployed daily builds and patch updates** in **dde-dev-stack and QA environments**, ensuring timely release cycles

- Enhanced **application availability and performance** by configuring **S3 buckets, firewall rules, ELB, and Auto Scaling**, aligned with monitoring and alerting tools.

SKILLS

Cloud Platforms	Microsoft Azure, Amazon Web Services
CI/CD Tool	Jenkins, GitLab, Azure DevOps
Containerization Tools	Docker, Kubernetes
Configuration Management Tool	Ansible
Infrastructure Provisioning Tool	Terraform, Cloud Formation
Source Code Management Tool	Git ,GitHub, Git lab
Monitoring Tool	Prometheus, Grafana, Azure Monitor, Cloud watch
Scripting Languages	Bash, Python ,Shell Script
Project Management Tools	Jira
Operating System	Linux, Windows

EDUCATION

- BABA Institute Engineering college, Visakhapatnam Kakinada University Graduated.

Declaration:

I hereby declare that the information furnished above is authentic and true to the best of my knowledge and belief.
