

Satya. R

GCP Cloud Engineer

Email: - satyacloud59@gmail.com

phone + 91 9703717051

• Professional Summary: -

- 4+ years of hands-on experience as a Cloud & DevOps Engineer specializing in **AWS** and **Google Cloud Platform (GCP)**.
- Designed, built, and deployed scalable cloud-based solutions using **GCP Compute Engine, VPC, Subnets, Firewalls, IAM, and Cloud Storage**.
- Implemented **VMware to GCP server migrations** using *Migrate to Virtual Machines (M2VM)* service.
- Developed **Terraform IaC modules** for automated infrastructure provisioning and multi-environment deployments.
- Managed **ECS, EKS, and GKE clusters**, including container orchestration, scaling, health checks, and troubleshooting.
- Configured **ArgoCD Applications and AppProjects** for GitOps-based deployment automation across dev, stage, and prod environments.
- Automated CI/CD pipelines using **Jenkins** and **GitLab CI**, integrating build, test, and deployment workflows for Java and containerized applications.
- Built real-time streaming pipelines on GCP using **Pub/Sub, Dataflow, and BigQuery**, improving data processing latency by 40%.
- Managed **S3 buckets and GCS storage** with versioning, lifecycle, and retention policies for cost-effective and secure data storage.
- Implemented **auto-scaling, load balancing, and disaster recovery** strategies for high-availability and fault-tolerant systems.
- Hands-on experience with **IAM, encryption, certificate management, and access control** to meet enterprise security standards.
- Automated operational tasks using **Python scripting**, enhancing deployment efficiency and reducing manual workload.
- Proficient in **Linux server administration**, virtualization, performance tuning, and system-level troubleshooting.
- Experienced in **monitoring and logging** using Cloud Logging, Cloud Monitoring, and AWS CloudWatch for proactive issue resolution.
- Collaborated cross-functionally with Dev and QA teams in **Agile & Scrum** environments, ensuring timely releases and smooth project execution.

• **Technical Skills:-**

Operating Systems	Windows, Linux
Version Control	GIT, GITHUB
Continuous Integration Tools	Jenkins, Cloud Build ,CI/CD
Build Tools	Maven
Cloud Services	(AWS ,GCP)Compute Engine, VPC Firewall, GKE, IAM, Cloud Storage, Cloud SQL, Logging & Monitoring, Big Query, Pub Sub, Data flow,
Container Orchestration	Kubernetes, Cloud run, Cloud function ,Docker
Infrastructure Provisioning	Terraform
Scripting Languages	Shell, Python

• **Employment History:-**

Worked as a GCP Cloud Engineer in **HCL TECH.** 20221 to 2024

Working as a cloud engineer in **Genpact** 2024 to Till Date

Educational Qualifications:-

Bachelor of Technology (**B.Tech**) from Jawaharlal Nehru Technological University (Kakinada), 2015.

• **Project Experience:-**

Project: -1

Title : INFOR(XM)

Role : GCP Infrastructure

Roles & Responsibilities: -

- Actively took ownership of the issues related to performance.
- Designed and implemented **GCP foundations and Landing Zones** to establish secure, scalable, and compliant cloud environments.

- Created and managed **VPCs, subnets, shared VPCs, firewall rules, and VPC peering** for efficient network communication.
- Deployed and maintained **Compute Engine, App Engine, and Kubernetes Engine (GKE)** for containerized and VM-based workloads.
- Automated infrastructure provisioning and configuration using **Terraform**, ensuring consistency across environments.
- Managed **VM migrations** from on-premise to GCP using **Migrate for Virtual Machines**, optimizing resource utilization.
- Configured **auto-scaling, load balancers, and instance templates** to enhance application performance and reliability.
- Implemented and monitored **Cloud Operations (Stackdriver)** for observability, logging, and alerting across GCP projects.
- Managed **IAM policies, roles, and permissions**, ensuring least-privilege access and security compliance.
- Developed and scheduled **ETL pipelines using Cloud Composer (Airflow)** for automated data ingestion and transformation.
- Built and optimized **BigQuery data models**, improving query performance and reducing operational costs.
- Implemented **CI/CD pipelines using Jenkins**, integrating **Docker and Kubernetes** for seamless deployments.
- Actively handled **performance tuning, security audits, and incident resolution**, ensuring continuous availability of cloud infrastructure.

Project: -2

Project Title : Sales Information System Role

: Cloud engineer

Roles & Responsibilities: -

- Monitoring of cloud infrastructure to ensure system, applications, services, and business processes are functioning properly.
- Design cloud infrastructure for healthcare applications following best practices and HIPAA compliance.
- Set up virtual networks, subnets, firewalls, and load balancers.
- Set up Identity and Access Management (IAM) policies to enforce least-privilege access.
- Automation and Infrastructure as Code (IaC)*
- Automated data quality checks and monitoring using Dataform and BigQuery scheduled queries, improving reliability and data governance.
- Utilized Cloud Storage and BigQuery to build a cost-effective data lake architecture, storing over 10 TB of structured and unstructured data
- Configure and manage VPCs, VPNs, and peering to ensure secure and efficient networking between services.
- Implement firewall rules and security groups to control access to healthcare services and data
- Ensure encryption of data at rest and in transit by using DLP (Data loss prevention) API
- Implement scalable and secure storage solutions by using GCS (Google cloud storage) and BQ (Big Query)
- Set up monitoring tools to ensure system reliability, availability, and performance.
- Set up continuous integration and continuous deployment (CI/CD) pipelines using cloud build.

- Automate testing, building, and deployment of applications to GCP environments.
- Troubleshoot issues related to infrastructure, networking, and security.
- Collaborate with DevOps, developers, and data engineers to resolve performance or operational issues

• **Declaration: -**

I hereby declare that the above information is true and correct to the best of my knowledge and nothing has been distorted.
